

Pre-Natal screening for genetic diseases

Genesafe Inherited - £800

This test screens for the five most common inherited recessive genetic disorders such as Cystic Fibrosis, Beta Thalassaemia, Sickle cell Anaemia and Deafness Autosomal recessive type 1a and 1b.

Genesafe De Novo - £800

This test screens for 44 severe genetic disorders as a result of de novo mutations (a gene mutation that is not inherited) in 25 genes.

Genesafe Complete - £1,050

This test screens for both the inherited and de novo single-gene disorders with the combined test providing a complete picture of any potential risk to the pregnancy.

****PreNatalSafe complete is a combination of the two most powerful tests available worldwide
PrenatalSafe KaryoPlus + GeneSafe complete are offered together at the reduced price of £1500

For all the tests the turn around time is 3-5 days from receipt of the sample in the laboratory.
